Accuracy opens in Milan

Levallois-Perret, May 14, 2008

Accuracy has announced that it will open of its fourth European office in Milan. This office will join Accuracy's other offices in Paris, Madrid and Amsterdam as it marks a new stage in Accuracy's expansion throughout continental Europe. The company's positioning policy and independence continue to be extremely popular with both companies and financial investors.

Accuracy Milan is open for business.

The office is managed by **Alessandro Reitelli, age 38**, who holds a postgraduate diploma in Economic Science from the University of Rome. Alessandro began his career with Arthur Andersen (1994 to 2002) where he was involved in numerous acquisitions and disposals on behalf of French and foreign industrial groups and capital investors.

After working as the Internal Audit Manager at PPR from 2002 to 2006, he subsequently joined the CFAO Technologie subsidiary in Algeria, as Assistant General Manager, to handle the subsidiary's recovery.

Alessandro Reitelli is currently assisted by two professionals from the auditing and consultancy industries:

Giovanni Zanelli, age 38, a former employee of Arthur Andersen, specialist in financial modelling and valuations.

Renato Francesco Vigezzi, age 39 years old, a former employee of one of the "Big Four," specialising in transaction support.

The Milan team is projected to increase to six professionals by the end of 2008.

Why Milan? *"The Italian acquisitions and disposals market is an extremely active one. There are very few companies operating in our field in Italy. A number of our clients requested high quality assistance services meeting international standards in this country. These three factors ensure that the new office has great potential,"* explained Accuracy's Chairman & CEO Frédéric Duponchel.

The Madrid, Amsterdam and Milan offices are supervised from Paris by Frédéric Duponchel. With this new site, Accuracy is increasing its international support network for its clients which include major listed and unlisted group, in addition to financial investors.

Accuracy now has 100 consultants, including 65 in Paris and is emerging as one of the market's major players.

Accuracy has developed a new model in financial consultancy services. The company undertakes "tailored" assignments in the corporate finance field, and does not intervene in regulated professional activities (auditing or public accounting, etc). Accuracy's areas of expertise include transaction support, corporate assessments and valuations, support with dispute resolution and litigation, in addition to corporate recovery. Accuracy's shareholder is the AON group.
